Spike's Physical Health Benefits

Spike improves your **cardiovascular system**, **endurance**, **core muscles**, **upper body** and **balance coordination**.

Spike's Mental Health Benefits

All Spikes, amongst other assistive devices is proven to give the user both physical and mental health benefits and improve **social participation, personal awareness, individuality** and **self confidence**.

Studies show that the appearance and the performance of the assistive devices affect "how the informants view themselves. The informants experienced assistive devices offered them **identity** as an active person, and they were considered **less handicapped** when using an adapted bicycle compared to an electric wheelchair.

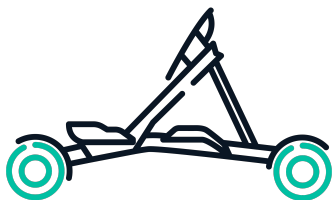

– Liv Ilseng, Master of Science (MSc) in Physical Activity and Health NTNU: "Assistive devices and participation in physical activities."

Individuals with mobility impairments who use AAT (assistive activity technology) for leisure-time physical activities experience opportunities to participate in ordinary and valued activities that allow them to improve their **social positions**. Further, use of AAT provided the informants with opportunities to alter their daily routines, enjoy time on their own and enhance their **personal awareness**. Having opportunities to use AAT independently is experienced as a recognition of their **individuality**."

– Heidi Pedersen, S. Söderström & P. S. Kermit: "How assistive activity technology affects participation in everyday life"

What do the Spike's riders say?

**“SPIKE MAKES
ME FEEL
LIKE I CAN
RUN”**

Robynne, USA

**“FINALLY I SEE
THE BOY AND
NOT THE
ACTIVITY
AID”**

Mother of Casper,
Norway

“Spike Snow is the coolest nordic sit-ski I’ve ever tried and I’ve skied since the stone age. Finally a nordic sit-ski that allows you to use all your strength with your legs in front of you”

- **Kjetil Korbu Nilsen**
Prev. sledge hockey paralympic gold medalist

“Proud to have contributed to Spike Snow which I think will make para nordic skiing easier and more motivating for people”

- **Viljar Aasan**
Activity aid leader, Beitostølen Helsesportsenter

“I’ve tried many different sit-skis over the years, but you don’t have to search anymore. Try Spike Snow you’ll find that this is something for you”

- **Lars Andresen Jr.**
Para nordic skiing Paralympian and Norwegian champion

Spike used by clubs, organizations and healthcare centers

Perfect for activity centers

→ Do you run an organization that wants to promote inclusive activity for everyone, regardless of functional level?

Spike and Spike Snow are widely used by activity centers and institutions worldwide, thanks to their high adaptability and shared spare parts, enabling inclusive and engaging experiences.

Adaptive Sports Discovery

Education & Awareness

Enhanced Accessibility

Inclusive Event

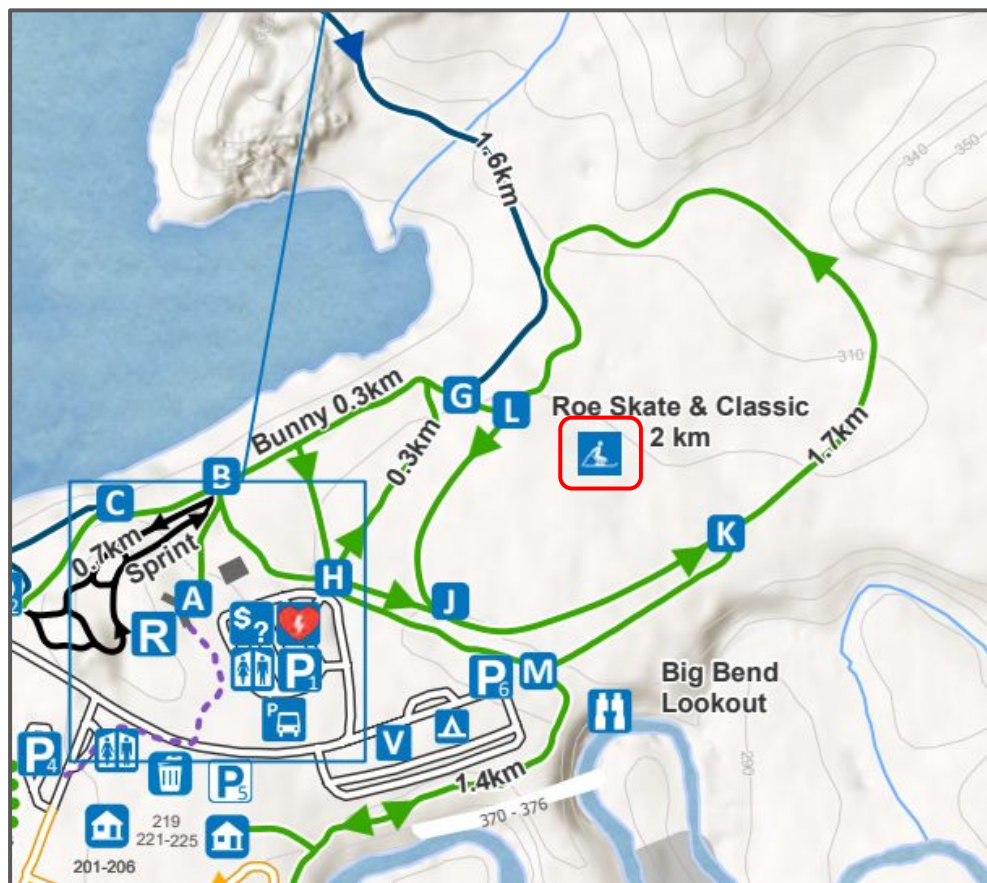

Development of Para-Sports

New Partnerships & Innovation

Example - Arrowhead Provincial Park

Arrowhead Provincial Park is an example of an organization that has bought Spike's and offers that type of equipment to visitors who need adaptive equipment. They also work on making the park inclusive by having their own adaptive cross-country ski tracks.

Product details

Product number : SP3000

Length: 108 cm | Weight: 5,1 kg | Max user weight: 110 kg

Winter & Comfort

Spike Snow is an adaptive winter sports equipment that lets you be **adventurous on the ski tracks**. The seated sitting position makes Spike Snow suitable for people with a higher degree of disability or who otherwise can't sit on their knees.

Spike Snow is equipped with a **foam cushion** in the seat for good comfort.

Video - [Easy installation of skis](#)

Attaching skis to your Spike Snow requires **no modifications of the skis** allowing you to take full advantage of the skis properties.

Detaching your skis from Spike Snow is quick and simple making for convenient transport and storage.

This allows you to convert all the power in the track to spike **faster, longer** and **steeper**.

Adjust to you

Spike Snow comes in **one size** and is adjustable to a range of different body shapes. Adjust the seat angle, height and width, and adjust the footrest to your leg length for an **optimal sitting position**.

Seat angle: -19° til 37°
Leg length¹: 78-105 cm

Seat width: 32-41 cm
Seat height²: 30-40 cm

¹ Leg length is measured from your hip to your bottom heel.

² Seat height is measured from the ground to the seat.

Spike

snow KIDS

Product details

Product number : SP5000

Length: 86 cm | Weight: 4,8 kg | Max user weight: 110 kg

Winter & Comfort

Spike Snow Kids is an adaptive winter sports equipment that lets you be **adventurous on the ski tracks**. Spike Snow Kids is designed for children with limited mobility, providing them with a safe and enjoyable way to experience outdoor activities.

Spike Snow Kids is equipped with a **foam cushion** in the seat for good comfort.

Video - [Easy installation of skis](#) - assistance to the children

Attaching skis to your Spike Snow requires **no modifications of the skis** allowing you to take full advantage of the skis properties.

Support skis underneath the frame provide **stability** on the snow, and the equipment can be either **pushed** from behind using **the handle** or **pulled** like using the **sled pull**. This allows adults—whether parents, caregivers, or instructors—to easily assist the child.

Adjust to you

Spike Snow Kids comes in **one size** and is adjustable to a range of different body shapes. Adjust the seat angle, height and width, and adjust the footrest to your leg length for an **optimal sitting position**. It can also be modified to match an adult sitting position.

Seat angle: -19° til 37°
Leg length: 52-105 cm

Seat width: 32-41 cm
Seat height: 30-40 cm

Product details

Product number : SP1000

Length: 116 cm | Weight: 14,3 kg | Max user weight: 110 kg

All terrain & Comfort

Spike is a new adaptive sports equipment that lets you be adventurous on various terrain, transitioning smoothly from **city roads** to **forest trails**.

Spike is equipped with a **foam cushion** in the seat for good comfort.

Steering System

Steer by moving your upper torso to each side while generating forward propulsion with poles. Spike is equipped with two separate **hydraulic brakes** and parking brakes.

Adjusts to your needs

Spike comes in **one size** that is adjustable to a variety of body lengths. Adjustments can also compensate for any asymmetrical weight distribution or body shapes (i.e. amputees).

Seat width: 32-41 cm
Seat angle: 30°-60°

Thigh length: 31-55 cm
Calf length: 32-57 cm
